NEW HDS BENEFIT

Athletic mouth guards for children

Nearly 60% of children six-years-old or older participate in outdoor sports across the nation. This puts them at risk of an oral injury. One third of all sports injuries are to the face.

An athletic mouth guard is beneficial in reducing the adverse effects of trauma and injury to the teeth during sports. Your EUTF and HSTA VB HDS plan will cover one athletic mouth guard for patients ages 18 and younger. This benefit is allowed every 24 months.

Avoid common oral injuries in contact sports, wear a mouth guard.
